Request for Class II Permissive Change

September 19, 2017

Federal Communication Commission
Equipment Authorization Division
Application Processing Branch
7435 Oakland Mills Road
Columbia, Maryland 21046

FCC ID : NKR-SY30
Applicant : Wistron NeWeb Corporation

To Whom It May Concern:

This is to request a Class II permissive change for FCC ID: NKR-SY30, originally granted on 02/01/2016. We changed the following points from the original model.

- Addition of antenna cables
- Addition of W53 and W56 bands by the firmware

Please refer to attached documents for details of these modifications.

Meanwhile we submit the following documents related to this change. There is no change before and after change except for these documents.

<input checked="" type="checkbox"/>	Test Report
<input type="checkbox"/>	External Photo
<input type="checkbox"/>	Internal Photo
<input checked="" type="checkbox"/>	User Manual
<input type="checkbox"/>	Label drawing/ location
<input type="checkbox"/>	Block Diagram
<input checked="" type="checkbox"/>	Specification
<input type="checkbox"/>	Schematic Diagram
<input type="checkbox"/>	Parts List

This time, we performed the testing and confirmed that this product still meets the minimum requirements of the applicable rules of FCC.

- DFS test (FZ5D0701-02 [Client]) and (11783009S-A [Master]):

Since W53 and W56 bands are added, we performed the DFS test.

- Radio test (FR5D0701-02AC [DTS WLAN2.4G], AD [DSS], AE [DTS BLE], AN [NII]):

Since the antenna gain is reduced due to the addition of cable, we performed the spurious emission test.

Please refer to the test report submitted with this application.

Thank you for your attention to this matter.

Sincerely,

Edward Yeh
