Backup has arrived: meet your Blue by ADT Cellular Backup Bridge. To ensure your home's security system continues to have a cellular backup, you **must install** the bridge before **February 22, 2022**.

Just follow the steps below:

- 1** Plug in your Blue by ADT Cellular Backup Bridge in the same room as your LifeShield Base. The bridge's Power LED will turn solid **green**.
- 2** Wait for the bridge's LTE LED to turn **solid red** and for its Sync LED to turn **solid blue**. This should take about 5 minutes.
- 3** Open your Blue by ADT app and scroll down to **History**. Make sure it says "**Cellular Backup Bridge Successfully Added.**"

Important safety information

1. Set up in accordance with the manufacturer's instructions.
2. Clean only with a dry cloth and do not expose the device to water.
3. Do not place this device in a confined space such as a bookcase or similar unit without proper ventilation.
4. Do not set up near any heat sources such as radiators, heat registers, stoves or other devices (including amplifiers) that produce heat.
5. Device contains a lithium-ion battery. Follow all local waste and recycling laws when disposing of the product.
6. **WARNING:** This product contains chemicals known to the State of California to cause cancer and congenital disabilities or other reproductive harm. Wash hands after handling.

Operating specifications

Operating temperature:

-4°F to 122°F (-20°C to 50°C)

Storage temperature:

-22°F to 158°F (-30°C to 70°C)

FCC Regulations:

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:—Reorient or relocate the receiving antenna.

—Increase the separation between the equipment and receiver.

—Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

—Consult the dealer or an experienced radio/TV technician for help.

RF Exposure Information

This device has been tested and meets applicable limits for Radio Frequency (RF) exposure.

This equipment should be installed and operated with minimum distance 20cm between the radiator & your body.
