Hi Mike,

Question #1: The computation of channel 79's peak output power was wrong, please correct.

Ans: Please find the attached for updated: CKBT_Report(FRF)0317.

Question #2: Two-third of 20dB bandwidth of the hopping channel is applied for channel separation in section 4.6 of test report, but the computation of two-third of 20dB bandwidth indicated in page 16 was wrong. Please correct it.

Ans: Please find the attached for updated: CKBT_Report(FRF)0317.

3/17/2005

Question #3: As indicated in the theory of operation, this Bluetooth can communicate with 802.11 b/g device, please explain how can Bluetooth establish link with 802.11 b/g device .

Ans: Please find the attached for updated: CKBT_Description of Operational(0317).

Best Regards,

M. Kuo

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information within 30 days of the original e-mail date may result in application dismissal and forfeiture of the filing fee. Also, please note that partial responses increase processing time and should not be submitted. Any questions about the content of this correspondence should be directed to the e-mail address listed below the name of the sender.
