

The Technical Description of Compact Fluorescent Torchiere

Model: CFT-75W & CFT-90W

The product covered by this report is a Compact Fluorescent Torchiere. The unit is a floor standing lamp and is intended to be connected to 120VAC supply source by a 2-wire supply cord.

The different of two model Torchieres are the ballast models ,the configuration of fluorescent tube, lampholders, electrical ratings, and mechanical construction of lamp shade.

The Technical Description of Compact Fluorescent Torchiere

Model: A32W-1, A42W-1 & A26W-2

The product covered by this report is a Electronic Ballast for fluorescent light fixture of portable lamps. The unit is intended to be connected to 120VAC supply source by two insulated lead wires.

The model A32W-1 & A42W-1 are same the PCB layout and enclosure dimensions. The only different between them are capacitor values and output parameters. The A26W-2 is different with A32W-1 & A42W-1 including different PCB layout, different components, different output parameters as well as it is to be connected to two lamps and another two models is to be connected to one lamp.
