BS5800XL12

Technical Specification

5725-5850MHz, 12dBd / 14dBi Gain

BASE STATION ANTENNA

Reliable Performance: Rated at 250 watts, you can expect years of continuous service.

Construction: The radiating elements are collinear stacked and phased copper alloy tubes. They are encased in a coated fiberglass radome for total environmental protection.

Weatherproof: The fiberglass radome is ultraviolet inhibited. The heavy wall aluminum mounting sleeve is epoxy coated for weather protection. It features a complete drain system to provide excellent condensation dissipation.

Lightweight: These antennas are lightweight at less than 4 lbs. and are designed to easily withstand winds of over 125 MPH.

Simple Installation: Using the optional BSMNT2 mounting kit, installation takes only minutes.

Termination: This antenna is comes with an "N" female termination. Pigtail models with special connectors are available.

 FREQUENCY:
 5725-5850MHz

 GAIN:
