

Response for NM8BALI

1. No confidentiality item is needed for this project and no cover letter is provided.
2. Got it.
3. Please check the inserting loss measured by PNA for this notch filter. We use notch filter to reduce harmonic from PA. However, for the frequency range of fundamental signal, we also measure it without notch filter, so we can check bandedge and restricted band. For example, you can check page 70 and 71 for the WLAN fundamental frequency range.
4. Please check the zoomed in plotting for the co-location bandedge. It is marginal pass.
