

1) Please note newly uploaded antenna photos with the location of antennae shown.

2) FCC ID has been corrected in two places of the user's ,manual, page 25 and page 28 to remove the space between "NM8" and "HIMALAYAS". See newly uploaded users manual.

3)The unit was tested both with the backpack accessory and without. SAR test report page 48, shows the Body-Worn back-touching with headset and pouch. The SAR Test Results on page 32, the first entry on the table is without the backpack. It was then determined that with the backpack it yielded the highest readings.

4) Due to the low power of the bluetooth transmitter, it was not tested in co-transmit mode.
