Dear Sir,

We just have FCC ID NM8JDV granted, unfortunately the exhibit named "SAR test setup photo" uploaded needs to be kept short-term confidential till Sep. 30. When we choose type "RF exposure Info", it becomes an exhibit that I can not tick short term confidential. This is why we may need your help to remove this exhibit from the database. We will upload and choose a correct exhibit type after you remove the old one. Thank you for your help.

If there are any questions, please contact me via the e-mail:
