

Remark:

1. Cell phones or Cordless phones can have the Identifier in the battery compartment under certain conditions.

a) The available label area on the phone is limited because they are relatively small and have many contoured surfaces, keypads, LCD displays, charge contacts and/or other connectors.

b) The batteries for these devices are designed for easy removal and that the labels will be visible whenever the batteries are removed for charging or replacement

c) The label will be readily visible at the time of purchase because the phone will be marketed without the battery installed.
