**AFFIDAVIT FOR IMEI PROTECTION
OF CELLULAR MOBILE TELEPHONES**

We hereby certify that the Handheld Portable Cellular Telephone (**FCC ID: NM8TND**) is so designed that it complies with all the requirements for IMEI protection specified in section 22.919 of the FCC Rules.

- A) The transmitter in service has a unique IMEI.
- B) The IMEI host component is permanently attached to a main circuit board of the mobile transmitter and the integrity of the unit operating software cannot be altered. The IMEI is plated from fraudulent contact and tampering. The IMEI is encoded using multiplication by a polynomial and the IMEI data programmed in the memory with other information.
- C) The IMEI is factory-set and cannot be altered, transferred, removed or otherwise able to be manipulated. Cellular mobile equipment is specifically designed such that any attempt to remove, tamper with, or change the IMEI code, its logic system, or firmware originally programmed by the manufacturer will render the mobile transmitter inoperative.

Sincerely,

A handwritten signature in black ink, appearing to read 'Eric Chen', written over a horizontal dashed line.
