

To whom it may concern,

Grayhill Inc. of LaGrange IL hereby submits the product model number EZCom-IP for certification of compliance with CFR 47 part 15.247. The intentional radiator spurious emissions, unintentional radiator spurious emissions and conducted spurious emissions tests were preformed at UL labs in Northbrook IL, while the remainder of the tests were performed at Grayhill's LaGrange location.

Per OET Bulletin 65 Supplement C section 3 for 2450MHz radios with 4W or less EIRP EZCom-IP will not exceed MPE limits in normal operation. As the radio is designed for use with outdoor antennas or a unity gain indoor antenna located in excess of 20cm from people no special instructions or warnings are necessary.
