**Subject: Class II Permissive Change under certification of
FCC ID: NN4RZ2009**

Dear Madam or Sir:

The purpose of the class II permissive change application is to authorize the additional antennas for a previously approved mini PCI module, which was tested under FCC Part 15.247 and modularly approved as FCC ID: NN4RZ2009. Necessary tests were carried out at Timco Engineering Inc.

The four additional antennas are:

3 dB of loss in the coaxial cable and a WNA-202F patch antenna
6 dB of loss in the coaxial cable and a KA-00 Cardioid antenna
3 dB of loss in the coaxial cable and a CA-01 Omni antenna
10 dB of loss in the coaxial cable and a YA2418RD Yagi antenna

There is no change on test article itself.

User's manual was revised to reflect the authorized installation of additional antennas. Other technical exhibits are not changed.

Please contact me if you have questions.

Sincerely,

Mitz Hase
On behalf of ROOT Inc.
