Subject: FW: TNB

Hi Diane:

I am working with LGC Wireless to perform additional tests. There are total of four TCB grants were issued under the product category of AMP (Amplifier). Last week during FCC/TCB monthly teleconference calls, FCC has informed to all TCBs that in the past, for In-Building RF antenna distribution system can be classified under AMP (amplifier) but after future investigation by the Commission, all In-Building RF antenna distribution system shall be classified as TNB. Due to equipment classification changes, there are additional tests need to be performed. I anticipate all necessary tests will be finished by tomorrow. I will upload and change the grant line entry next Monday.

Best Regards

Mike Kuo

Subject: TNB

1) Originally this application was for an AMP equipment class. It has been changed on 2/2803 to TNB. However the application is incomplete for a TNB. For example, the line items are incorrect. The emission designator and frequency tolerance is missing. There are two line items, one for uplink and one for downlink. I assume that this application is for the RAU downlink frequencies (correct me if I am wrong). Since this application is being modified from an AMP to a RAU TNB, I suggest submitting a cover letter explaining the application and what exhibits are applicable. I would also like all inapplicable exhibits superceded. Please review what is necessary and advise me on your course of action.

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information within 30 days of the original e-mail date may result in application dismissal pursuant to Section 2.917(c).

DO NOT Reply to this email by using the Reply button. In order for your response to be processed expeditiously, you must upload your response via the Internet at www.fcc.gov, E-Filing, OET TCB Electronic Filing, TCB Login. If the response is submitted through Add Attachments, a message which informs the processing staff that a new exhibit has been submitted must also be submitted via Submit Correspondence. Also, please note that partial responses increase processing time and should not be submitted.

Any questions about the content of this correspondence should be directed to the e-mail address listed below the name of the sender.
