

A red, circular electronic device, possibly a speaker or a small robot, is shown from a top-down perspective. The device has a smooth, slightly reflective red surface. Around the perimeter, there are several small, circular indentations or ports. Near the bottom edge, there are larger, oval-shaped openings with a mesh-like texture. A white rectangular label is placed in the center of the device, with the text "FCC ID Label Location" printed on it. The device is resting on a light-colored, wrinkled fabric surface.
