Tune up Procedure - Outdoor Mini-BTS

Tune-up procedure over the power range, or at specific operating power levels.

1. Connect the serial cable to debug connector on the MXBB-1, MXBB-2
2. Execute the terminal program with following option 19200 bps, 8 bit, 1 bit, None
3. Change the attenuation of the XCVU-P (transceiver) using the command.

Command) `chg_att [attenuation_value]`

(cf: attenuation_value: 0 ~ 600: attenuation 0 ~ 60.0 dB
 900 ~ 999: gain 0 ~ +9.9 dB

4. Measure the RF power of the output port placed on the AFEU-P rear panel.
5. Change the attenuation or gain with 0.1dB step using above command.
