OFF 12-00A   SUN 12-00A

7. Receiving and reading message

Your pager can receive up to twenty 20-character messages. When a message is received, the pager alerts for eight seconds.

1) Press any button to stop the alert.
2) Press Select button to display the message and the time the message was received.
3) Press Mode button twice while reading your message to return to the standby screen.

Message longer than 12 characters display on a second screen, indicated by the continuous message icon. Press Select button to display the second screen.

01234567890 1   234

The first screen of your message displays the message slot number and time received. If a

message is not read, the pager gives a remainder alert every two minutes and the screen displays the number of unread messages (i.e. 1 memos, 2 memos) until all messages are read.

If the pager receives more messages than its available memory can hold, the new message replaces the oldest read, unlocked message. An overflow condition occurs when all message slots are filled with unread message, while the pager is in the overflow condition, the oldest unread message is discarded.

At this time, the pager displays "MEMO FULL". Message must be read and erase to clear the overflow condition.
