

The image displays two views of a custom printed circuit board (PCB). The top view shows the component side of the board, which is populated with various electronic components including a large black integrated circuit (labeled '93L5175'), several smaller surface-mount components, and a small black component labeled '2X4'. A green wire is connected to a header on the left. The bottom view shows the reverse side of the PCB, featuring a large green component, a metal heat sink, and a coiled spring. The PCB is green and has a white label 'WU723-94V0A' on the top view.
