 eCM MAC: 11:22:33:44:55:66	

**Notes:**

The barcodes **MUST** have a minimum x-dimension of 5 mils (0.125mm). This can only be achieved by using a 600dpi printer.

The barcodes must be as wide as possible across the width of the label, while still including enough quiet zone to the left and right of the barcode to ensure an accurate scan.

Colons (: ) and hyphens (-) are to be used only in human-readable serial numbers. Do not include these in the barcoded serial numbers.

Minimum point size for serial numbers:  
 On base label: 8 point  
 On rear-panel label: 7 point
