

**Exhibit 11: RF Exposure/Environmental Evaluation**

The 900 SS Direct can be installed with the three different types of antennas listed below:

<u>Antenna Type</u>	<u>Model</u>	<u>Antenna Gain</u>
Centurion Dipole	CAF28715	2.15 dBi
Comtelco Yagi	Y2283A-66	6 dBi
Maxrad Omni	MFB9155	5 dBi

The 900 SS Direct is either professional installed or installed by the end user. In either case the installer is instructed in the user manual provided with each unit that in order to comply with the RF exposure requirements the 900 SS Direct must be installed with the approved antennas (listed above) and that a 20-cm separation distance must always be maintained between the antenna and the user or general public. Therefore, the 900 SS Direct complies with the RF Exposure/Environmental Evaluation requirements.
