

Exhibit 11: RF Exposure/Environmental Evaluation**Section 24.51 and 24.52****Requirement 24.51:**

The device must comply with IEEE C.95.1-1991, (ANSI/IEEE C.95.1-1992), "Safety Levels with Respect to Human Exposure to Radio Frequency Electromagnetic Fields, 3 kHz to 300 GHz". Measurement methods are specified in IEEE C95.3-1991, "Recommended Practice for the Measurement of Potentially Hazardous Electromagnetic Fields-RF and Microwave".

Requirement 24.52:

Licensees and manufacturers are subject to the radiofrequency radiation exposure requirements specified in § 1.1307(b), 2.1091 and 2.1093 of this chapter, as appropriate. All equipment shall be considered to operate in a "general population/uncontrolled" environment. Applications for equipment authorization of devices operating under this section must contain a statement confirming compliance with these requirements for both fundamental emissions and unwanted emissions. Technical information showing the basis for this statement must be submitted to the Commission upon request.

Demonstration of Compliance:

The S40 and S42 are classified as portable devices. Therefore, the S40 and S42 are subject to routine environmental evaluation for RF exposure as per § 2.1093(c).

Testing to demonstrate compliance to this section was tested in accordance with the requirements of ANSI C95.1, the results of the tests for both the S40 and S42 were sent as a separate pdf files.
