To: Intertek Testing Services (HK)**Date:** June 4, 1999**Attn:** Mr. H. Y. Vu**Fax:** 852-2741-1693**From:** Dante V. Coroma**Phone:****CC:** Wilson Ho**Ref. no:** DVC-060499-02**Re:** DTAM modifications.**Pages:** 1

Please be informed of the modifications on model MH9047 for meeting the requirements on spurious emissions.

*Changes on Base Unit:**R77 from 100K Ω to 200K Ω* *R101 from 10 Ω to 47 Ω*

"The DTAM area (i.e. the DTAM board) which generates the unwanted spurious signals was enclosed or protected with conductive shielding plate which is connected to the circuit ground". It must be noted that the shielding plate used in the sample is only a handmade. A machine made shielding plate would be used for mass production.

For your information and reference.

Regards,
