

Congratulations on purchasing the Protoyo High Performance R/C vehicle!
Please unpack all items carefully.

- 1) Transmitter
- 2) Transmitter Antenna
- 3) R/C car
- 4) Charger
- 5) 7.2V Battery
- 6) 9V batteries

Step 1

Charge the 7.2 volt battery. Read battery instructions before charging. Connect charger to battery for a minimum of 8 hours before playing. Make sure the battery is allowed to cool before using.

Step 2

Install 9V batteries into transmitter base.

Step 3

Screw in transmitter antenna firmly.

Step 4

Install 7.2V battery on the bottom side of the chassis. Connect the charged battery with the R/C car.

Step 5

Turn the R/C car power switch to “on “ position located on the bottom of the R/C car chassis.

Step 6

Turn the transmitter switch to the “on” position.

Step 7

To accelerate the R/C car forward, pull the trigger on the transmitter towards you. The more you pull the trigger, the faster the car will go.

Step 8

To steer the car turn the wheel located on the right side of the transmitter. Turning the wheel clockwise turns the car right. Turning the wheel in a counter clockwise direction turns the car to the left.

Step 9

Push the transmitter trigger forward to make the R/C car run in reverse.

Step 10

Make sure the setting of multi-channel selector match the selector of remote control before playing.

Warning: Changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user’s authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- ☐ Reorient or relocate the receiving antenna.
- ☐ Increase the separation between the equipment and receiver.
- ☐ Connect the equipment into an outlet on a circuit different from that to which the receiver is needed.
- ☐ Consult the dealer or an experienced radio/TV technician for help.
