

LAP-4200 w/ Locating Access Point

There are two separate Location Sensor models:

- LOS-4100 (802.3 Wired Ethernet)
- LAP-4200 (with 802.11b Wireless LAN Access Point, also known as a Locating Access Point)

The LAP-4200 contains a Symbol Technologies Spectrum 24 HR WLAN PC Card Model LA-4131 Access Point (FCC ID H9PLA4131M). **No changes have been made to the LA-4131 PC Card Access Point; it is utilized "as is" purchased from Symbol Technologies.** The included Access Point receives and transmits 2.4 GH DSSS signals from 802.11 compliant handheld communicator units.
