Re: WiData Firefly Tag Model Number TFF-1000-00AA

Request for withholding from public disclosure proprietary information submitted pursuant to an application for certification of a WiData Firefly Tag Model Number TFF-1000-00AA.

FCC ID: NSQTFF-1000-00AA

Dear Sir or Madame:

WiData requests that certain materials submitted with this application for certification of the Model TFF-1000-00AA Tag be withheld from public disclosure. This request is made under the provisions of Section 0.457 (d) of the Commission's Rules and Section 552 (b)(4) of the Freedom of Information Act, Trade Secrets.

The items marked "Confidential" contain detailed block diagrams, schematic diagrams, a detailed theory of operation and a detailed discussion of processing gain submitted to the FCC for review with this application. The information marked "Confidential", contains proprietary information and has either been placed in an envelope marked "Confidential", or on a separate floppy disk which is marked "Confidential", or has been transmitted electronically. Confidential files transmitted electronically contain pages marked with a "Confidential" legend on one or more pages of the file. Information so marked contains proprietary information (trade secrets) regarding the circuit operation and capabilities (specific values of components, circuit design details and system architecture) which are the result of our extensive investment in research and development. Without the disclosed information, competitive organizations would take considerably more time to assess and develop a workable competitive product. As a result, we believe that disclosure of these company guarded materials contained in an envelope or on a disk marked "Confidential" or files transmitted electronically bearing a "Confidential" legend on any page or pages of the file, would compromise our leading position in this market.

We therefore formally request that materials delivered in an envelope or on a floppy disk bearing a "Confidential" legend or transmitted electronically with one or more pages bearing a "Confidential" legend, be kept strictly confidential and not made available for inspection by any other party, except on a need to know basis for the sole purpose of the certification process.

Sincerely,

John A. Eisenberg  
Executive Vice President
