TO WHOM IT MAY CONCERN:

You will find our completed FCC Form 731 Application for Equipment Authorization and supporting data/test results in accordance with Code of Federal regulations Title 47, Paragraph 2.983 along with a request for Confidentiality. A check of \$610.00 is included to cover both fees as per the FCC Fee Filing Guide.

The product is a wireless local loop subscriber unit used in a wireless local loop system designed to operate in the U.S. AMPS frequency band. This System is based on the Japanese Digital Cellular Standard (PDC) and is designed to provide fixed wireless local loop services on a co-primary basis with other mobile cellular services. The applicable emission designator for this product is DXW.

The technical test data furnished to support our application was prepared under the supervision of William B. Baringer, Senior RF Engineer at DIVA Communications.

Further, I have enclosed photographs of the inside and outside of the product, circuit diagrams, a drawing showing the label location, as well as a copy of the FCC identifier label which will be affixed to each unit produced once the equipment has been type accepted.

I hereby certify that this application was prepared at my direction and that, to the best of my knowledge and belief, the facts set forth in this letter and the accompanying enclosures are true and correct.
