Compliance with 47 CFR 15.247(i)

"Systems operating under the provisions of this section shall be operated in a manner that ensures that the public is not exposed to radio frequency energy levels in excess of the Commission's guidelines. See $\S 1.1307(b)(1)$ of this chapter."

The EUT is a Bluetooth enabled device designed to provide hands free operation of a Bluetooth enabled cellular phone in a motor vehicle. The EUT will only be used with a separation distance of 20 centimeters or greater between the antenna and the body of the user or nearby persons and can therefore be considered a mobile transmitter per 47 CFR 2.1091(b).

Since the transmit frequency is greater than 1.5 GHz, and the output power is less than 3.0 W ERP, the EUT is categorically excluded from routine environmental evaluation per 47 CFR 2.1091(c).

The MPE estimates are as follows:

Table 1 in 47 CFR 1.1310 defines the maximum permissible exposure (MPE) for the general population as 1 mW/cm². The exposure level at a 20 cm distance from the EUT's transmitting antenna is calculated using the general equation:

 $S = (PG)/4\pi R^2$

Where: $S = power density (mW/cm^2)$

P = power input to the antenna (mW)

G = numeric power gain relative to an isotropic radiator

R = distance to the center of the radiation of the antenna (20 cm = limit for MPE estimates)

PG = EIRP

Solving for S, the maximum power density 20 cm from the transmitting antenna is summarized in the following table:

MPE Estimate

FCC ID: NT806NBTHFA

Antenna Type	Antenna Manufactur er	Antenna Part No.	Transmit Frequency (MHz)	Max Peak Conducted Output Power (mW)	Antenna Gain	Minimum Antenna Cable Loss (dB)	Power Density @ 20 cm (mW/cm²)	General Population Exposure Limit from 1.1310 (mW/cm²)
RHCP								
Rectangular								
Patch	Visteon	VP5ASF-19C037-AA	2400	1.9	4	0	0.001	1

The power density does not exceed 1 mW/cm² at 20 cm; therefore, the exposure condition is compliant with FCC rules.

The applicant's radio, FCC ID: NT806NBTHFA, is compliant with the requirements of 15.247(i).
