American Telecommunications Certification Body Inc.
6731 Whittier Ave, McLean, VA 22101

January 27, 2004

RE: Telematics Wireless Ltd.

FCC ID: NTAFP100RA

I have a few comments on the above referenced Application.

General Requirements

1) Your response references a maximum output power of +27 & +28 dBm, while the measured maximum provided in the report was 26.2 dBm. What is the expected worse case power. Please explain and additionally comment on how this relates to 90.205(q).

Part 90 Requirements

2) From the information provided, it is not certain if the device would be classified as mobile or fixed for purposes of RF exposure. Given the gain, use, etc, it is surmised that the device would be categorized as fixed. Please comment.

Part 15 requirements

3) Your response stated that the device is battery powered. Please note that the operational description suggests that the device may be battery powered. Therefore it is expected that normally by the nature and use of this device that AC/DC adapters are typically used, but for certain applications battery power is an option. If AC/DC adapters are expected to be used, compliance with 15.107 should be shown. Please provide.

Timothy R. Johnson
Examining Engineer
