RE: Tadiran Telematics Ltd.

FCC ID: NTAMMR1

I have a few comments on the above referenced Application.

- 1) I had a discussion with the FCC today regarding the antenna connector issue. The FCC is willing to accept the antenna connector as long as it is covered as provided in the photograph from the factory/manufacturer. They are concerned that the user should not be given any instructions regarding installation/removal of the antenna cover or the antenna itself.

To meet this requirement we will require a new manual with references to the professional installation of the antenna removed and an attestation that the unit will be fully assembled (including the antenna and cover) at the factory/manufacturer. Since the antenna will not be considered to have a connector external to the unit, and that it is not used by the average end user, professional installation becomes a mute point.

A handwritten signature in black ink, appearing to read "Timothy R. Johnson", is written over a light gray rectangular background.

Timothy R. Johnson
Examining Engineer
