RE: Telematics Wireless Ltd.

FCC ID: NTAWB1

After a review of the submitted information, I have a few comments on the above referenced Application. Depending on your responses, kindly understand there may be additional comments.

- 1) Response to previous comment 1 explained the mechanism for one of three paths (Receiving from meter and transmitting toward programmer or concentrator). However how about receiving from the programmer and transmitting to the meter? Please explain.
- 2) Previous Comment 6 does not appear to be addressed. Please explain compliance to 15.247(g) and 15.247(h) for the Frequency Hopping TX portion of the system (I believe this was mode 5 in the test report, path 1 in the operational description).
- 3) In the newly provided test report, many plots appear lower resolution than previously provided. It appears the conversion settings have changed. Please correct since the units, frequencies, etc can not be clearly read on many plots.

Timothy R. Johnson
Examining Engineer

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information may result in application termination. Correspondence should be considered part of the permanent submission and may be viewed from the Internet after a Grant of Equipment Authorization is issued.

Please do not respond to this correspondence using the email reply button. In order for your response to be processed expeditiously, you must submit your documents through the AmericanTCB.com website. Also, please note that partial responses increase processing time and should not be submitted.

Any questions about the content of this correspondence should be directed to the sender.
