Subject: Requesting Class II permissive change for FCC ID: NTMWT808T

To Whom It May Concern:

The purpose of this letter is to request a Class II Permissive change for FCC ID:
NTMWT808T.

We would like to extend the frequency range from 640.1-662.7MHz to 640.1-663.9MHz by firmware controlling. All design including electronic, electrical and mechanical designs remain the same except the above-mentioned change. We change the frequency by different set-up of software. The end user can not control the frequency setting because it is only accessible to the manufacturer.

Best Regards
