Dear Helen,

Please find attached revised test report. The modulation limiting data has been retested.

Best regards,

S. S. Liou
Engineer / EMC Dept. II
Electronics Testing Center, Taiwan

Hello Iris,

I don't know if you have received the following question:

Upon further review it appears that there is a discrepancy between the declared FM deviation of 65 kHz and the modulation limiting at 26 kHz. Occupied bandwidth appears to be consistent with 65 kHz.

Please indicate correct FM deviation level and submit modulation limiting data consistent with the actual FM deviation used with this product.

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information within 30 days of the original e-mail date may result in application dismissal and forfeiture of the filing fee. Also, please note that partial responses increase processing time and should not be submitted. Any questions about the content of this correspondence should be directed to the e-mail address listed below the name of the sender.
