RE: FCC Part 15 Application for Class II Permissive Change
Robertshaw Controls Company (FCCID: NU9TX0625-0300)

Dear Sir or Madam:

Enclosed, please find the above referenced application for a Class II Permissive Change. The difference in the current version of the product is that the circuit board has been converted from a 2 layer board to a 4 layer board. Neither the transmitter circuit nor the schematics changed.

Please feel free to contact me if you have any questions or need additional information.
