Class 2 Permissive Change letter

Subject FCC ID: NUC-WE310F5 and IC ID: 3287A-WE310F5

Brady Corporation requests a Class II Permissive Change pursuant to FCC Part 2.1043, 15.212, KDB 178919 and ISED RSP-100 to the referenced IDs and certifies that SAR testing has been carried out to address RF Exposure requirements for co-location and portable configurations.

It should also be noted this module is restricted to Brady Corporation host devices and will never be sold or marketed to third parties. Because this module is not offered to the general public and only available in our host-product production line, as a component, the module's installation instructions is controlled and prohibited from becoming public or disclosed to unauthorized persons.

Brady Corporation has made no hardware changes to the module. Brady host devices will only utilize the modules WiFi 2.4GHz connectivity features, the Bluetooth Low Energy firmware has been disabled at factory and is not end-user accessible.

Sincerely,

A handwritten signature in black ink that reads "Stephen W. Grimes".

Stephen W. Grimes
