

5 Install the batteries and perform the door handing process

This step will teach your lock the orientation of your door and is crucial to lock operation.

В

Α Install 4 AA batteries in battery pack.

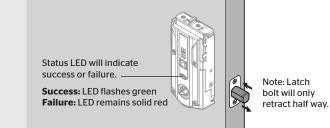

Make sure the door is open, and insert the battery pack.

After a few seconds, the latch bolt will retract and extend on its own to learn the orientation of the door. This is called the door handing process, and it is crucial to lock operation.

С

D

11

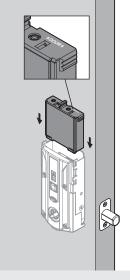

If the latch bolt does not move on its own, or if the Status LED indicates a door handing failure, make sure the cables are connected, the batteries are installed correctly, and attempt this procedure again.

If the door handing process is still unsuccessful after a second attempt, perform the "Manual Door Handing" procedure on page 4.

A Ensure correct polarity. For best results, use new, non-rechargeable Alkaline batteries only.

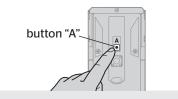

Add the lock to your smart home system

Α

D

- A Initiate the process to add the lock to your system at your smart home controller. Refer to your smart home system instructions for more information.
- **B** When prompted by your smart home system to add the lock, press button "A" on the lock interior one time. The red LED will illuminate when the lock enters Add Mode.

Please allow time for the controller to add the lock.

В

- If successful, re-name the lock in your system (if applicable).
- **D** If unsuccessful, follow your system's instructions to remove the lock from the controller and any other network, then press button "A" on the lock one time.

Perform steps 6A-6C again.

If still unsuccessful, consult the Programming and Troubleshooting Guide on the SmartCode 888 page at kwikset.com.

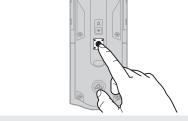

С

Add user codes (30 max)

It is recommended that you add and delete all user codes through your smart home control system. If your system does not allow this, codes may be added directly to the lock as shown here.

Programming Timeout

During programming, if no button is pressed for five seconds, the system will time out (indicated by three beeps and a red flashing lock button), and you will need to restart the procedure.

Make sure the door is open. Press

the Program button once.

What lights and sounds does the lock produce?

Enter user code. A total of 30 user

90

or

С

must be a unique code between 4 and 8 digits, depending on your smart home system.

Mastercode

For enhanced security, a mastercode may be used when adding and deleting user codes. For more information about the mastercode, download the Programming and Troubleshooting Guide on the SmartCode 888 page at kwikset.com.

Lock button flashes green once with one beep

Programming was successful.

Lock button flashes three times with three beeps

Press Lock button once.

Programming was unsuccessful.

Make sure not to pause for more than 5 seconds during programming.

Make sure the user code is not a duplicate and that it is between 4 and 8 digits during your next attempt. Make sure the lock has room for an additional code. If all user code positions are filled, delete a code to make room for this one.

Test the lock (review normal operation) and re-key the lock (if needed)

Confirm that the code(s) added in previous step can unlock the door.

Locking the Door

8

Re-Key with SmartKey

Re-key the lock to work with your existing key. See the supplied SmartKey Re-key instructions for more information.

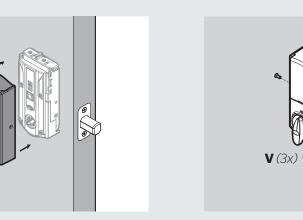

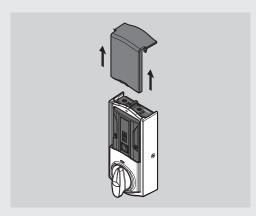

A Install the interior cover.

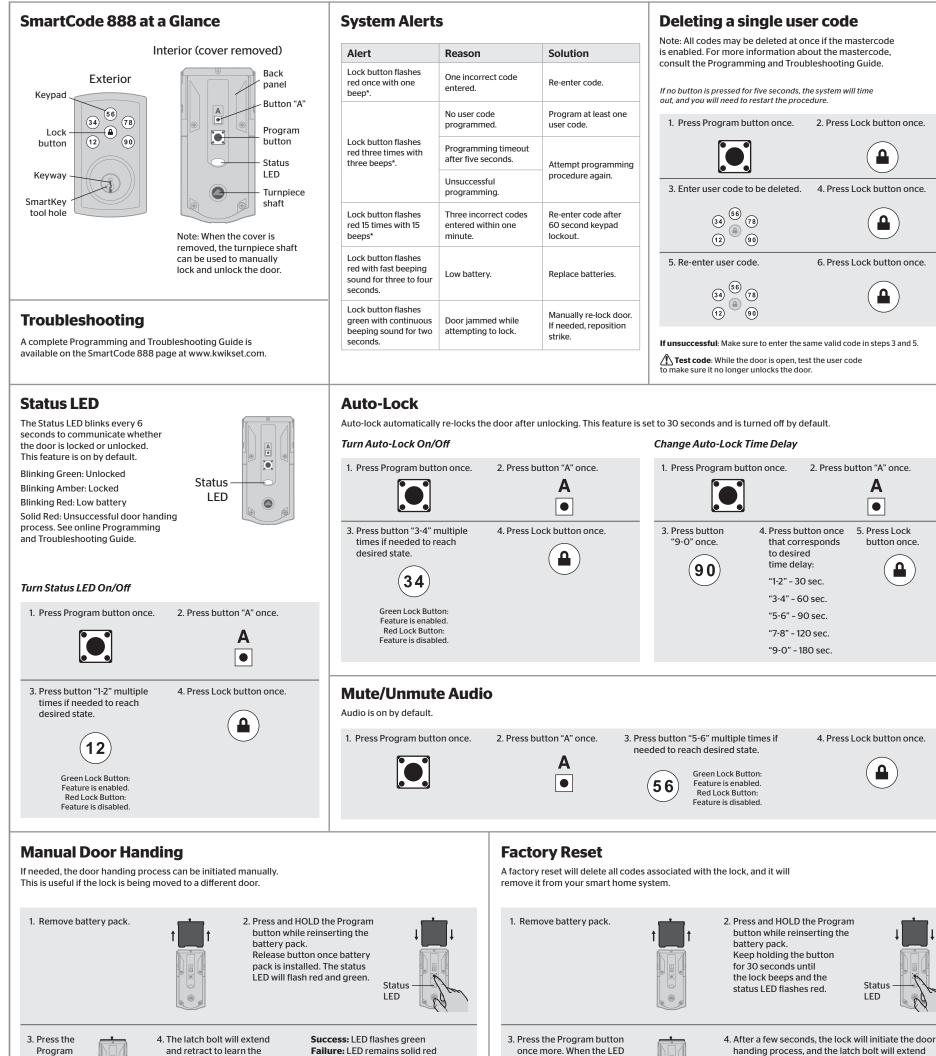

M

Note: To access the battery pack or back panel, slide up the window on the interior cover.

handing process, and the latch bolt will extend and retract to learn the orientation of the door.

button once

The Status LED will indicate success or failure.

orientation of the door.

see the online Programming and Troubleshooting Guide or call Technical Support.

If the Status LED indicates a failure.

, the lock reset.

flashes green and you hear

Network Information

Removing the lock from the network

Follow your smart home system's instructions to remove the lock from the network. When prompted by the system, press button A" on the lock interior once.

Z-Wave System Notes

This product is a security enabled Z-wave Plus product and must be used with a Security Enabled Z-Wave controller to be fully utilized. Z-Wave is a "Wireless mesh network," and results may vary based on building construction and communication path

To assure interoperability, each Z-Wave product must pass a stringent conformance test to assure that it meets the Z-Wave standard for complete compliance with all other devices and controls. The Z-Wave identity mark assures consumers, integrators, dealers and manufacturers that their products will reliably perform with any other Z-Wave device. And, regardless of the vendor, always powered nodes may act as a repeater for Kwikset/Weiser/Baldwin products.

Z-Wave Configuration and Association Parameters are available on the SmartCode 888 page at www.kwikset.com.

Important Safeguards

- 1. Read all instructions in their entirety.
- 2. Familiarize yourself with all warning and caution statements.
- 3. Remind all family members of safety precautions.
- Protect your user codes and mastercode. 4.
- 5. Dispose of used batteries according to local laws and regulations.
- **CAUTION:** Prevent unauthorized entry. Since anyone with access to the back panel can change the user codes, you must restrict access to the back panel and routinely check the user codes to ensure they have not been altered without your knowledge. The use of a mastercode can help protect your system's settings.
- **WARNING:** This Manufacturer advises that no lock can provide complete security by itself. ⚠ This lock may be defeated by forcible or technical means, or evaded by entry elsewhere on the property. No lock can substitute for caution, awareness of your environment, and common sense. Builder's hardware is available in multiple performance grades to suit the application. In order to enhance security and reduce risk, you should consult a qualified locksmith or other security professional.
