Subject: UNIXTAR TECHNOLOGY, FCC ID: NUOUT-106, Assessment NO.: AN06T6090, Notice#1

Question #1: This device is considered as portable device in normal operation. But MPE calculation is included in the test report. Also user manual includes 20 cm separation distance restriction. Please update the documents.

Ans: The userman had been revised.

Question #2: Based upon most current FCC15.247(a)(1)(iii), "Frequency hopping systems in the 2400-2483.5 MHz band shall use at least 15 channels." But the test report indicates 75 channels. Please revise the test report.

Ans: The test report had been revised.

Best Regards,

Helen Zhao

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information within 30 days of the original e-mail date may result in application dismissal and forfeiture of the filing fee. Also, please note that partial responses increase processing time and should not be submitted. Any questions about the content of this correspondence should be directed to the e-mail address listed below the name of the sender.
