**CI WIRELESS 800 MHZ ESMR BAND 4 WATT
EKOCELL REPEATER**

Form 731 Correction

February 19, 1999

Please note the CI Wireless 800 MHz ESMR Band 4 Watt EkoCell Repeater supports TDMA and IDEN (GSM format) Part 90 compliant signals. We request that the Commission make the following correction to the Form 731 for this application:

Change the Emission Designator for the first emission type from F9W to GXW. The F9W designator corresponds to CDMA while the GXW corresponds to the IDEN (GSM format) signal. All other data on the Form 731 is accurate.

The bandwidth corresponding to the CDMA signal would not be compliant with the Part 90 specifications.
