Re: Adjustment of the Model 080-300925 Amplifier in the Field

The Model 080-300925 Amplifier offers only adjustment of gain (below its maximum gain level) to the technician during installation and maintenance activities. This adjustment is dependent on the physical environment in which the amplifier is to be installed and is described in the Installation and User's Manual. This is the only adjustment accessible without opening the amplifier. Frequency response and gain thresholds are factory set and, under no circumstances, are they to be adjusted in the field.

Authorized Signature

A handwritten signature in black ink that reads "Joseph Strzelecki".
