

## FCC RF EXPOSURE INFORMATION

**WARNING!** *Read this information before using your phone*

In August 1996 the Federal Communications Commission (FCC) of the United States with its action in Report and Order FCC 96-326 adopted an updated safety standard for human exposure to radio frequency electromagnetic energy emitted by FCC regulated transmitters. Those guidelines are consistent with the safety standard previously set by both U.S. and international standards bodies. The design of this phone complies with the FCC guidelines and these international standards.

Use only the supplied or an approved antenna. Unauthorized antennas, modifications, or attachments could impair call quality, damage the phone, or result in violation of FCC regulations.

Do not use the phone with a damaged antenna. If a damaged antenna comes into contact with the skin, a minor burn may result. Please contact your local dealer for replacement antenna.

### **Body-worn Operation for Model: EBTX-210**

This device was tested for typical body-worn operations using the body-holster (Model: EBTX-210) placed 1.2cm. from the body. To comply with RF exposure requirements, a minimum separation distance of 1.2cm. must be maintained between the user's body and the belt-clip/holster, including the antenna. The use of other belt-clip/holsters and other non-tested accessories may not comply with FCC RF Exposure requirements and should be avoided.

### **Body-worn Operation for Model: EBTX-220**

This device was tested for typical body-worn operations using the body-holster (Model: EBTX-220) placed 2.5cm. from the body. To comply with RF exposure requirements, a minimum separation distance of 2.5cm. must be maintained between the user's body and the belt-clip/holster, including the antenna. The use of other belt-clip/holsters and other non-tested accessories may not comply with FCC RF Exposure requirements and should be avoided.
