

3.1 KHDD-1000S/HF Configuration Variants

<i>KHDD-1000S/HF TYPICAL CONFIGURATION VARIANTS</i>	
KHDD-1000S/HF	1 MW Peak Pulsed Power Transmitter, Horizontally Polarized Antenna*
KHDD-1000S/HF-DP	1 MW Peak Pulsed Power Transmitter, Horizontally and Vertically Polarized Antenna*, Elevation over azimuth antenna positioned,
<p><i>*note: Typical antenna variants range from 20' to 28' with specialized antennas available. For FCC type acceptance and RF power density the specifications highest gain antenna currently available are utilized so compliance is "worst case" for any potential installations.</i></p>
