

## **Antenna information MYLAPS TnetX Communicator**

Antenna type: magnetic Ferrite bar / copper coil type

Size: 3.7 x 11.6 x 59.3mm (Ferrite bar outer dimensions)

Material: Ferrite material and copper.

Gain: Since the antenna is of the magnetic coil type and very small compared to the used wavelength (59mm length vs 44000mm wavelength) no antenna gain is possible.

External antenna connection: Not possible
