Subject	Reply to your remarks regarding NXYTRANX
C.c.	-
Your reference	EA94304 / 8433
Reference number	991399

---

Dear Mr. Dichoso,

Please find attached new exhibits which should cover all your remarks in your email with reference number 8433.

1. The FCC ID: NXYTRANX will only be valid for the devices TranX 160 and TranX 260. All other devices have been taken out the original application and will be filed seperately under FCC ID: NXYTRANKART (TranX 120) and NXYTRANXREC (TranX decoder).
2. The readability of the schematics should be improved with the new exhibits and it should now be possible to read them with the viewer software.
3. The transmitters have been retested in accordance with your remarks. A new test report has been uploaded including new photographs of the test setups.

Best regards,  
NMI Certin B.V.
