

January 23, 2014

To whom it may concern,

This application for change of ID is in response to the purchase of Homelink from Johnson Controls Incorporated, which was completed on 10/1/13. Gentex is requesting to change the ID, which was originally certified for Federal Communications Commission and Industry Canada, which utilized the company codes of CB2 and 279B respectively. FCC ID CB2HONUMHL4 was originally issued on June 9, 2008.

The new ID would reflect the Gentex company codes for FCC and IC replacing the JCI company codes and read as follows, with NZL and 4112A. The device will not differ in any way from the original and the original test results continue to be representative of and applicable to the equipment Gentex will be marketing. See exhibits B thru E for the specific list of ID's.

Sincerely,

---

Craig Harder, EMC Lab Manager
