

GENTEX CORPORATION

A Smarter Vision®

August 25, 2014

Federal Communication Commission
Equipment Approval Services, P.O. Box 358315
Pittsburgh, PA 15251-5315
Attention: Authorization & Evaluation Division

Application for Certification of Gentex Corporation Transmitter under 47 CFR 15.231 and 47 CFR 15.247.
Model: LUAHL5 FCC ID: NZLLUAHL5

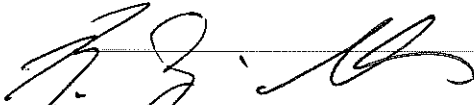

To whom it may concern,

Gentex Corporation requests to replace the user manual exhibit. The user manual submitted still had references to Johnson Controls trade marking, which was not noticed after review by Gentex. The user manual has now been updated to reflect the acquisition of HomeLink by changing all references from Johnson Controls to Gentex Corporation.

The Gentex Model UAHL5 is part of the Homelink ® V series. Homelink ® V devices are capable of learning garage door opener frequencies and codes from the user's original transmitter. The device is capable of learning in the range between 286MHz and 440MHz excluding forbidden frequency regions. In addition, there is a mode in which it functions at 902-928MHz and operates under the rules of FCC part 15.247.

The Federal Communications Commission will be notified, in writing of any changes in the software/programming of this device that could affect its RF characteristics. Please do not hesitate to contact me with any questions you may have regarding this. As always we look forward to your timely response.

Sincerely,

Craig Herder
Lab Manager - EMC Lab
