Attention: Authorization & Evaluation Division

Application for Class Two Permissive Change Certification of Gentex Corporation Transmitter under 47 CFR 15.231 and 47 CFR 15.247.
Model: UAHL5H FCC ID: NZLU AHL5H

To whom it may concern,

Gentex Corporation requests a Class 2 Permissive change due to a change to the UAHL5H product, which is a programmable frequency garage door opener and digital device controller to be installed in the automobile rearview mirror. The Gentex model UAHL5H is part of the HomeLink® V series. HomeLink® V devices are capable of learning garage door opener frequencies and codes from the user's original transmitter. The Class 2 change consists of the following due to adding a frameless variant of our mirror assembly requested by the customer:

- Exterior Housing
- Glass Element
- Mount Assembly
- Software Power Settings

There were minor PCB change to support these component changes. The power settings were lowered where applicable to comply with the FCC limits. The device is capable of learning in the range between 286MHz and 440MHz excluding forbidden frequency regions. In addition, the device operates at the 902-928Mhz.

Sincerely,

Brian Miller
Lab Regulatory Group Leader II
