

TCB Question:

The brochure says Software Defined Radio. Is this just a marketing term or is it SDR as defined by the FCC in Part 2.944?

Applicant Answer:

No, it is not a Software Defined Radio.

TCB Question:

The brochure lists many bands and many technology types. Please confirm that this device does not support any bands other than the 2.3 GHz band and only WiMAX technology.

Applicant Answer:

It does not support LTE or any technology other than WiMAX. It only operates in the 2.3 GHz band.

TCB Question:

The Operation Description states an output power of 30 dBm. The test report shows a measurement of 28.8 dBm composite. Please confirm that device was transmitting at maximum output power.

Applicant Answer:

It was set to maximum (30 dBm) during the testing. It is 30 dBm composite.

TCB Question:

Please confirm that the device does not support other 'types' of modulation.

Applicant Answer:

It does not support other types of modulation. Only OFDMA.
