

14<sup>th</sup> March 2011

Indoor use of FCC ID:O2J-SCRT-1-49T

The device operates under 47CFR90 partY providing public safety services.

The product was designed to allow installation and operation in outdoor locations to provide coverage over a range of several km. However, there are also scenarios where it is beneficial to allow operation under cover and/or within large, open buildings.

The original grant lists outdoor use and we request that this is modified to also allow use indoors when mounted on suitable structures.
