Dear Sirs,

thank you very much for your response dated 26.02.01.

In your email you asked us about the labelling of the phone module with regard to the labelling of the cellular phone connected to the phone module. Please be informed that the module itself and the cellular phone will be labelled seperately. This is the reason why the phone module label will not contain any information about the cellular phone. The phone module will be labelled according to the label layout uploaded on 06.11.00.

The phone module will be used with various cellular phones in the future and it is not possible to give a list of cellular phones it will be used with at this time. Because the labelling will be done as mentioned above, labelling requirements for cellular phones to not have to be considered for the phone module label.

I hope this clarifies the labelling issue.

Thank you very much

Best Regards

Torsten Lohoff
