

Class II change explanation for INGENICO brand:

This application is a permissive class II change on existing FCC ID: **O34-I7770BASE** and it adds family device model **INGENICO 7780** (within Ingenico referred to as “v-base with BTv1” {in radio test report referred to as “BASE STATION” model 7780BAS} to the previously granted model **INGENICO 7770** (within Ingenico referred to as “radio base with BTv1” {in originally filed radio test report referred to as “BASE STATION” model I 7770}). The bluetooth module used in the two mentioned models are identical, thus the radio portion is unchanged, while the motherboard, processor on the motherboard and enclosure changes are representing the changes to this product.

Test approach:

Test report number 5017528-M1 filed in this application, issued on May 26 2005 by LGAI Technological Center, S.A. (Spain) is representing a re-measurement of all mandatory ruleparts.
