

# fisica

## Instructions

### Download

Wahoo Fitness Utility App from iTunes.

### Insert

*fisica* securely into 30-pin connector at bottom of iPhone, iPod touch or iPad.

### Open

Wahoo Fitness Utility and select Sensor tab.

### Select

sensor you would like to pair with iPhone, iPod touch or iPad. Ensure the sensor is within 5' of *fisica*.

### Done!

Your sensor should show data from the sensor, the signal strength and the serial number of your sensor. Since ANT+ sensors 'sleep' when not in use, you may have to 'awaken' it - for example, a footpod can be activated by taking a few steps.

### Other Apps

Each App has a unique way in which it works with sensors so there is no universal method for using *fisica* with all Apps. One common feature is that each App can be 'paired' with a particular sensor to avoid readings from other people's sensors. Check our website for the current list of Apps compatible with your *fisica* sensor key.

### 3rd Party Sensors

*fisica* will work with all wireless sensors that conform to the ANT+ standard. However, third party sensors have not been tested or verified by Wahoo Fitness and the accuracy of the data produced may not be as precise as those of Wahoo Fitness sensors

### Contact Wahoo Fitness

Please feel free to contact Wahoo Fitness for any questions you have regarding your product.

#### **FCC Statement**

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

To assure continued compliance, any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment. (Example-use only shielded interface cables when connecting to computer or peripheral devices).

#### **Radiation Exposure Statement**

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment and it also complies with Part 15 of FCC RF Rules. Operation is subject to the following two conditions:

- 1) This device may not cause interference and
- 2) This device must accept any interference, including interference that may cause undesired operation of the device.

#### **Caution!**

The manufacturer is not responsible for any radio or TV interference caused by unauthorized modifications to this equipment. Such modifications could void the user authority to operate the equipment.

#### **Canada Statement**

This Device complies with RSS-210 of the IC Rules; Operation is subject to the following two conditions:

- (1) This device may not cause interference and
- (2) This device must accept any interference received, including interference that may cause undesired operation.

The device meets the exemption from the routine evaluation limits in section 2.5 of RSS 102 and users can obtain Canadian information on RF exposure and compliance from the Canadian Representative as seen below:
