Re: FCC ID: O4MU952T

Applicant: Ascom Wireless Solutions, Inc.

Correspondence Reference Number: 22859

731 Confirmation Number: EA999593

Dear Diane:

I have been advised that the signal substitution data submitted on May 10, 2002 from the European report for the U952T was based on a sample with a 5W output whereas the version to be marketed in North America is limited at 2 W.

The test laboratory has provided the attached signal substitution method results prepared in response to your recent request. The procedures used for this method are as per TIA/EIA 603.

I believe that today is the 60<sup>th</sup> day from your original email so we want to be certain that all your concerns have been addressed.

If there is anything further required, please contact me at 315-375-7860 or via email at [jsprgrp@twcnny.rr.com](mailto:jsprgrp@twcnny.rr.com).

Best regards,

Ruth Varley
